WHY USE POWER ASSIST STEERING?

Power assist steering dramatically reduces steering effort in heavy or high torque applications. Power assisted steering delivers exceptional performance and unparalleled levels of safety and comfort, even in the most extreme conditions.

Today's high horsepower engines are much heavier and are producing more propeller torque than ever before. Naturally, this additional weight and torque has an effect on the boat's steering when these loads are transferred to the wheel. Unacceptable levels of steering load can increase driver fatigue and discomfort.

The Dometic SeaStar Power Assist virtually eliminates all steering loads and provides modern boaters the same level of steering comfort and control found in cars. Even in the most extreme applications, the boat will be more comfortable to steer.

The Dometic SeaStar Power Assist allows the boat to be driven safely and easily by the whole family.

FEATURES

- Dramatically reduces steering effort
- Wall or Floor mount
- Easy to install
- Simple add-on to an existing SeaStar Steering system (From 1.4 to 2.4 SeaStar Helms)
- OEM or retro-fit
- Compatible with power purge system
- Return to manual in failure mode
- Suitable for use with autopilots
- 12V or 24V operation
- Wiring harness included
- Ignition protected (SAE J1171)
- ABYC, CE, NMMA, ISO 10592 Approved

DESCRIPTION	PART NO.
Power Assist, 15' Harness	PA1200-2
Power Assist, 25' Harness	PA1225-2
Power Assist PRO, 15' Harness	PA1315-2
Dual Ignition Control Kit	HA1201
